3 May 1968

Dear Ed:

In January, I sent to you an analysis of the BIMAT processed half of GT-67-466. Since then, we have had access to the field (Versamat) processed half and have reviewed that. I enclose a copy of the study.

While there are not enough "swallows to make a summer" as the saying goes, it would appear that the Bimat system offers comparable results to anything else feasible in the field.

ELG:atr Encl.

E. T. G.
